

Plantain.

Perennial weed. Dig out roots.

Spreads by Seed

Annual Mercury. Spreads by seed.

Pulls out easily.

Lambs Quarters

*Chenopodium album* is a fast-growing weedy annual plant

Thistle. Perennial with strong tap root.

Very prickly – wear gloves!

Annual Nettle. Quick growing weed sets seed from a young age. Remove by hand but wear gloves!

Shepherd's purse. Rosettes of leaves grow all year round, sending up heart shaped seed pods after white flowers.

Remove plants and seedheads as soon as you can as seeds can still germinate 30 years after being dormant in the soil.

Groundsel. Produces seeds all year round. Remove uprooted plants from the ground as these can still set seeds that germinate.

Hairy Bittercress

Short flower stems can propel seeds up to a metre away, so remove the rosettes as soon as you can.
